

Jack Cao

737-895-5742 | jack.cao@utdallas.edu | [Portfolio](#)

EDUCATION

University of Texas at Dallas

B.S in Computer Science

Dallas, TX

Aug 2024 - May 2028

EXPERIENCE

Congero Technology Group

Jun 2026 - Aug 2026

Software Engineering Intern

Remote

- Implemented custom **Oracle BRM opcodes in C** for account provisioning, resource lookup, and real-time AI usage rating across prompt-, token-, and USD-based balances
- Built a **React + TypeScript reporting dashboard** backed by **SQL queries** to surface customer transactions, revenue, usage statistics, balance impacts, and billing records from Oracle BRM
- Wrote **testnap validation flows** to provision accounts, simulate usage events, and verify pre/post-rating balances, generated events, and standardized error handling in a non-production Oracle BRM training environment

QT-Data Group

Jun 2025 - Aug 2025

Web Development Intern

Ho Chi Minh, Vietnam

- Deployed a **Python** data pipeline with **BeautifulSoup** and **Selenium**
- Scheduled **QA checks** to keep datasets deduplicated; adding **rate limiting**, **pagination**, and **record validation** to ensure accurate datasets for downstream analysis
- Automated **YouTube** script generation, narration, and thumbnail prompting with **LLM-driven** agents via **REST APIs** orchestrated in Python, reducing end-to-end production time by **70%**

Portlogics JSC

Jun 2023 - Aug 2023

Intern

Ho Chi Minh, Vietnam

- Rebuilt dashboard UI in **React** with reusable components and **accessibility-minded patterns** (keyboard focus, ARIA roles); reduced user error by **19%** from QA reports
- Integrated **REST endpoints** via **Axios** with client-side validation and error boundaries; improved detection accuracy by **35%** through refining data labeling UX

PROJECTS

CitizenVoice | *TypeScript, React, TailwindCSS*

Sept 2025

- Built a **civic-engagement** app with **Auth0**, reusable React components, and hooks; modeled a **PostgreSQL** schema in Supabase with **Row Level Security**, SQL seed scripts, and helper functions
- Integrated **interactive map features** using **React-Leaflet** and cache-aware state management via **TanStack Query** with invalidation policies for scalable frontend

Smartnest | *TypeScript, React, TailwindCSS*

Apr 2025 - Jun 2025

- Developed a marketing site using **Next.js** and **Tailwind**; structured components for rapid iteration with **TypeScript** configs
- Implemented **Node.js API routes** for backend functionality and structured the repo for **CI/CD compatibility**, including linting, testing hooks, and preview deployments

Stock Tracker | *Bubble.io, REST APIs*

Mar 2025 - May 2025

- Prototyped a **portfolio tracker** in Bubble using reusable elements, custom states, and workflow triggers to manage UI state and periodic data refreshes
- Integrated **QuiverQuant REST API** via Bubble API Connector, and built dynamic filtering and charting tools for investor analysis

Crypto Landing Page | *TypeScript, React, TailwindCSS*

Dec 2024 - Jan 2025

- Built a **responsive landing page** with modular components, dark mode, and optimized build output (tree-shaking, minification) for fast TTI
- Page adoption drove over **\$2M** at peak trading volume and achieved a **20%** daily growth in new holders

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, C++, SQL

Backend: Node.js, REST APIs, PostgreSQL, MongoDB

Lighthouse

Frontend: React, Next.js, Tailwind CSS

Cloud/Tools: Vercel, Docker, Firebase, Git, ESLint, Vite,
